PRIČVRSNI ELEMENT

RING®

PATENTIRANI SUSTAV

RING® pričvrsni element rezultat je stalnog razvoja i traženja novih rješenja. Jedinstvena, brza i povoljna, ova nova vrsta **patentiranog pričvrsnog elementa** omogućuje da se ograda na drveni stup učvrsti na **potpuno siguran način**. Ovo je rješenje savršeno za ruralna i prirodna okruženja jer je **utjecaj na okoliš ograničen**: nije potrebno graditi betonske zidove niti koristiti metalne temelje za ogradu, što bi narušilo prirodnost staništa. **Vruće pocinčana i plastificirana** u boji RAL 6005; trajnost i kvaliteta tijekom vremena su zajamčene.

PRIMJER: korištenje pričvrsnog elementa za zatvaranje privatnog vrta

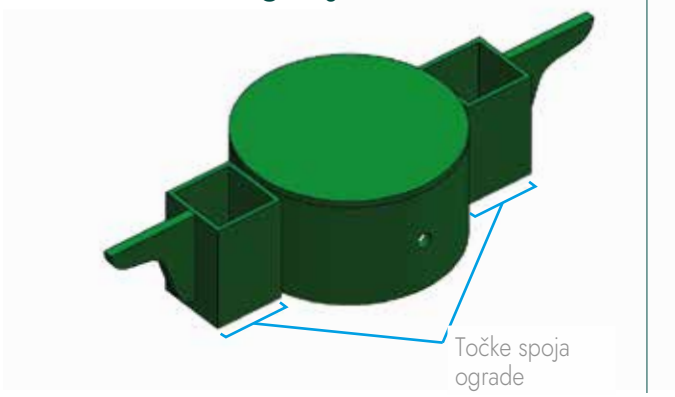

PROJEKT: osiguranje ograde na nasipu uz pješačku stazu

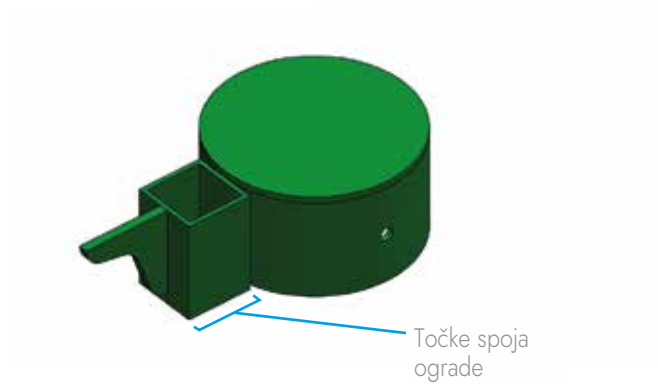

JEDINSTVENO, BRZO I POVOLJNO

OGRADA SE UZ **RING®** PRIČVRSNI ELEMENT POSTAVLJA **ZA NEKOLIKO MINUTA**

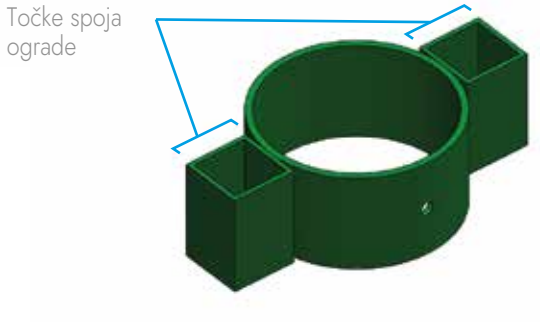

Dvostruki **RING®** - **gornji**

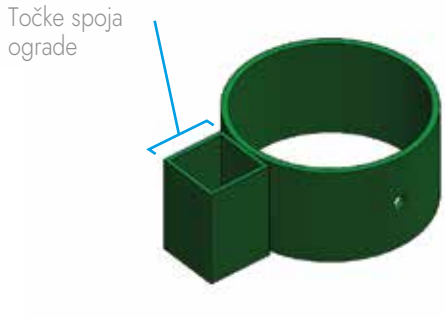

Jednostruki **RING®** - **gornji**

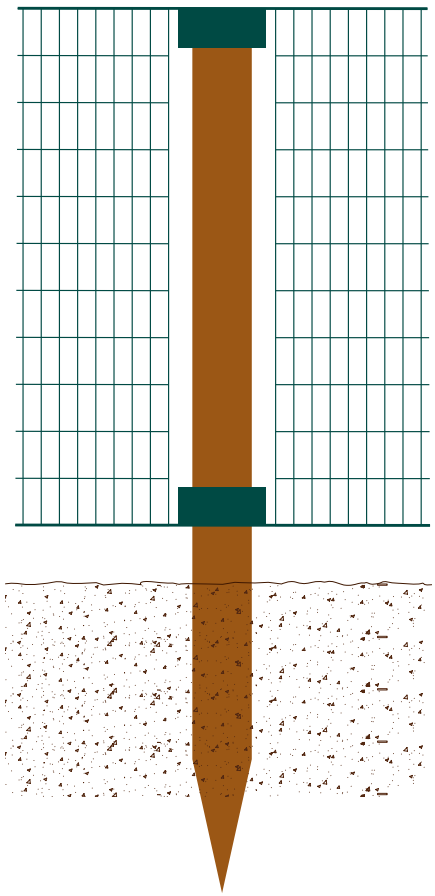

Dvostruki **RING®** - **donji**

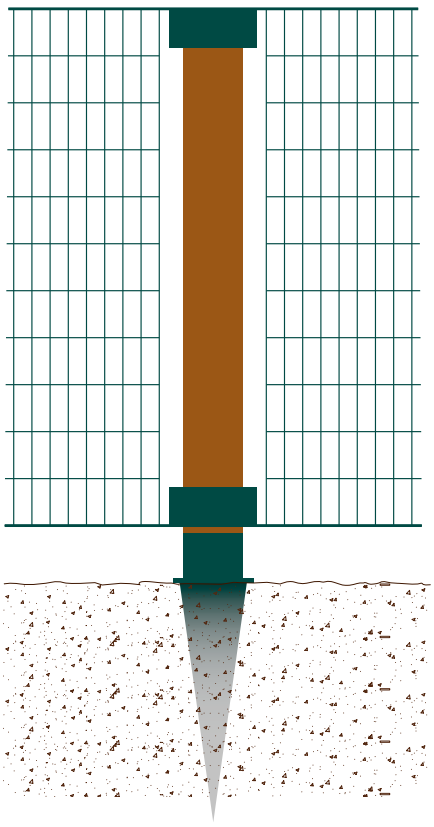

Jednostruki **RING®** - **donji**

SUSTAV MONTAŽE

DETALJI UČVRŠĆIVANJA

1 Učvrstite drveni stup u tlo (ubetoniranjem/vijcima)

2 Umetnite donji Ring® pričvrsni element (dvostruki ili jednostruki)

3 Postavite gornji Ring® pričvrsni element (dvostruki ili jednostruki)

4 Postavite ogradni panel

5 Učvrstite donji Ring® pričvrsni element samourezujućim vijkom
